ESQUICHO N 3- LA VENTANA-ABERTURAS

■ OBJETIVO GENERAL

Reconocimiento de alternativas tecnológicas para la resolución de aberturas, formas, dimensiones, funcionamiento, elementos constructivos y materiales. Ejercitación sobre la realización de la documentación gráfica correspondiente.

■ DESARROLLO

Ejecute planilla de aberturas de puertas y ventanas interiores y exteriores, indicando:

1. Designación.
2. Cantidad.
3. Ubicación.
4. Forma de abrir.
5. Material marco.
6. Material hojas.
7. Herrajes.
8. Tipo de vidrio.
9. Observaciones.
10. Vista esc. 1:25 de cada abertura.
11. Detalles esc. 1:10 / 1:5 de corte de abertura.

■ PRESENTACIÓN

Técnica libre.

Carpeta con caratula y rótulos oficiales

Trabajo individual

Referencia bibliográfica: Documentación de la cátedra (Apunte contenidos básicos- Cuaderno 1- Arquitectura y Materialidad) y teórico de la cátedra.

EL VAND : UN SÍMBOLO DE ESPACIO VIVO ...

... LA ARQUITECTURA ES EL TRABAJO DE ABRIR HUECOS PARA LOGRAR
CONEXIONES CON EL MUNDO EXTERIOR.....
... ESTOS HUECOS QUE PERMITEN LA CONEXIÓN CON EL EXTERIOR SON LOS
QUE POSIBILITAN LA CREACIÓN DEL 'ESPACIO VIVO'.....

HINOSHI HARADA / discrete City vol 7.

CARPINTERIAS

- PUERTAS Y PORTONES

- VENTANAS

- CELOSIAS, PERSIANAS, POSTIGONES Y CORTINAS DE ENROLLAR

- MUROS CORTINA

- REJAS, BARANDAS
- ROPEROS, PLACARES
- TABIQUES DIVISORIOS

FIJAS

•DE ABRIR

•CIEGAS

•TRANSPARENTES

Las partes moviles necesitan mecanismos que permitan movimiento y la posibilidad de cerrar la hoja movil

•HERRAJES

DE ACCIONAMIENTO:

- manijas
- manijones
- pomos
- cubetas
- simplones
- palancas
- tiradores

DE MOVIMIENTO:

- bisagras: fichas, pomelas, de resortes, invisibles.
- rodamientos
- pivotes
- especiales.

DE RETENCIÓN:

- cerraduras
- pasadores
- aldabas
- fallebas
- retenes o ganchos
- candados
- barras de empuje
- enrolladores manuales o mecánicos
- dispositivos electrónicos – mecánicos
- dispositivos electro-mecánicos.

Carpinterias:

- Impermeabilidad al aire
- Estanqueidad al agua
- Transmitancia termica y sonora
- Resistencia al viento y temperatura
- Resistencia mecanica
- Facilidad de manejo
- Seguridad contra violaciones
